

MIP Rear Stinger Exhaust Kit for Traxxas T-Maxx:

#01-367

www.miponline.com

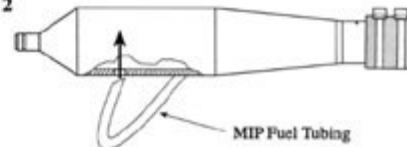

Please follow instructions completely for installation of the MIP Rear Stinger Exhaust kit for your Traxxas T-Maxx.

- Step 1:** Remove the stock exhaust system and header from your T-Maxx.
- Step 2:** Use the two 1" alloy screws and supplied gasket to secure the MIP Rear Exhaust Header onto your engine.
- Step 3:** Use soapy water to lubricate the black header hose while stretching it over the end of the Shiny Stinger Pipe.
- Step 4:** Slide the Shiny Stinger Pipe through the back body mounts and onto the Rear Exhaust Header. For more clearance you should trim off some of the plastic crest on the rear shock tower.
- Step 5:** Use the two MIP high temp tie wraps to secure the Stinger pipe onto the Header.
- Step 6:** Use supplied MIP fuel tubing for the exhaust pressure line. Connect the fuel tubing to the pressure fitting on the gas tank, and push the other end of the fuel tubing into the hole in the Stinger about 1/2 inch (Fig2).
- Step 7:** Trim the rear section of your lexan body for the exhaust to exit.

Completed Assembly

Fig. 2
