### RAPTOR BLADE MODIFICATION

(AMENDED Feb. 22, 2002)

#### Instructions:

1. Mark around blade grips with a felt-tip marker.
2. Remove blade grips and cut covering lightly .125" inside of mark, being careful not to cut into blade.
3. Repeat for opposite side.
4. Trim bosses if necessary to allow tight fit on the blades.
5. Lightly sand inside of grips for better adhesion. Apply included epoxy to blades in area shown top and bottom. Be generous with the application to ensure a strong bond.
6. Attach blade grips and tighten screws.
7. Wipe off excess epoxy.
