Fig. #2

Fig. #3

1. Remove your stock pipe and header.
2. Use supplied header gasket and screws to bolt the MIP rear Stinger header onto your motor.
3. Use soapy water to lubricate the black header hose while stretching it over the end of Stinger pipe and header. Now secure in place with supplied black high temp. tie wraps.
4. Connect MIP fuel tubing to pressure fitting on the gas tank, and push the other end of the fuel tubing into the hole in the Stinger pipe about 1/2 inch (Fig. #1).
5. Cut a 3" piece of fuel tubing and slide over the MIP Stinger wire brace as a cushion (Fig. #2). Now bend the small loop end of the wire brace down 90° (Fig. #2).
6. Slide the wire brace around the Stinger pipe and bolt it to the rear body mount as shown in (Fig. #3).
