

## *"Green Grass and Open Sky"*

*The wonder of flying an aviation classic. The scent of green grass with an unobstructed view of open sky. This is why you started flying park flyers in the first place. It also happens to be why ParkZone™ created the J-3 Cub Charge-and-Fly™ park flyer.*

*The ParkZone J-3 comes with everything needed to get flying in one box—even the transmitter batteries. In fact, you could pick up a ParkZone J-3 on your lunch hour, charge the battery on the drive to the park, spend about five minutes attaching the wing and landing gear and be flying with time to spare.*

**No building. No painting. Nothing else to buy. Just fly.**

**J-3 Cub**  
PKZ1100

- 37 in wingspan
- Ready-To-Fly with transmitter, batteries and charger
- Fully proportional 3-channel FM transmitter
