Building the clutch / Samenstellen van de koppeling Zusammenstellen von die Kupplungsglocke / Montage de l'embrayage

Optional parts

This clutch will give you more torque and an instantaneous response.
Avec ce type d'embrayage, vous obtenez une réponse instantanée à l'accélération ainsi qu'un meilleur transfert de la puissance aux roues.

Use special air filter oil (Protech LX906) on the sponge filter to stop dust from getting in your engine. Never run the engine without air filter and oil.

Gebruik speciale luchtfilerolie (LX906) op de mousse van de luchtfilter om te vermijden dat stof en vuil in de motor komt. Rij nooit zonder luchtfiler of zonder luchtfilerolie.

Benutzen Sie die spezielle Luftfilteröl LX906 auf der Schaum des Luftfilters. Fahren Sie niemals ohne Luftfilter oder Luftfilteröl.

Utilisez toujours une huile spéciale pour filtre à air (Protech LX906) sur l'éponge du filtre afin d'empêcher la poussière d'entrer dans le moteur. Un filtre sans huile n'est pas efficace.

**Mounting the engine / Monteren van de motor
Montierung des motor / Montage du moteur**

Check backlash of spur gear and clutch bell gear. The backlash between the spur gear and the clutch bell gear should amount to the thickness of a paper strip. The gear must mesh without jamming.

Kontroleer de afstand tussen het aandrijftandwiel en het koppelingstandwiel. De afstand mag niet meer zijn als de dikte van een papieren strip. De tandwielen moeten vrij kunnen draaien zonder te blokkeren.

Kontrollieren Sie den Abstand zwischen die Zahn-
räder von dem Motor und von das differential. Den Abstand zwischen beide muß ungefähr die Dicke eines papierstrips sein. Die Zahnräder mußen frei in einander können drehen ohne zu blockieren.

Contrôlez régulièrement le "jeu" qui se trouve entre la cloche d'embrayage et la couronne principale. Ce "jeu" ne pourra dépasser l'épaisseur d'une feuille de papier. Trop ou pas assez de "jeu" entraînera une usure prématurée de la couronne principale.

**Mounting the tyres / Bevestigen van de banden
Mountierung von Reifen / Montage des pneus**

Brush the tyres with sand paper and clean it to obtain a better adhesion for the glue.
Apply instant glue on both sides of the wheel between the rim and tire.

*Schuur de banden op met schuurpapier en maak ze zuiver om een goede hechting te verkrijgen met de lijm.
Doe secondenlijm op de twee zijden van het wiel tussen de velg en de band.*

Schleifen Sie die Reifen mit Schleifpapier. Säubern Sie die Reifen für eine bessere heftung von Klebstoff.
Kitten Sie Klebstoff am innen- und ausenseite zwischen den Reife und Felge.

Poncez légèrement le bord intérieur du pneu et nettoyez le bord de la jante afin que la colle cyanoacrylate adhère convenablement. Appliquez la colle entre la lèvre du pneu et la jante sur les 2 côtés de la roue.
